LOW TOELESS WORK SHOE

36-48

CASUAL PRO 20347

Low safety shoe, in Microfiber Rubber B-tech Hydro WPA, thickness 1.8-2.0 mm. Highly breathable and abrasion-resistant fabric lining. The shoe is reinforced in the heel area with tear- and abrasion-resistant, non-slip microfiber, which helps stabilize the foot during movement. Soft, lined tongue.

COMPLETELY METAL-FREE SHOE.

CASUAL SOLE dual-density antistatic polyurethane, resistant to hydrolysis ISO 5423:92, hydrocarbons, and abrasion, antishock and anti-slip.

ANTITORSION insert in the sole to provide stability on uneven ground.

ENERGY INSOLE dual-component in open-cell polyurethane and OEKO-TEX® certified fabric, with an anti-fatigue memory PU foam pad in the heel resistant to body pressure. Anatomical, extra comfort, breathable, removable, absorbent, conductive, and antibacterial.

ESD the shoe meets the electrical resistance requirements in accordance with IEC 61340-4-3:2017 (IEC 61340-5-1:2024).

FO resistance to hydrocarbons/oils (sole).

SR slip resistance (ceramic floor + glycerin).

Size 36-48 | **Weight** (size 42): 380 g.

Anti-Torsion Sole

ANTI-SLIP RESULTS

*after simulation of walking by slight abrasion

Ceramic tile floor with NaLS (mandatory)	Forward Heel (heel slip 7°)	Backward heel (heel slip 7°)	Ceramic tile floor with glycerin (optional SR)	Forward Heel (heel slip 7°)	Backward heel (heel slip 7°)
	≥ 0.550.54	≥ 0.550.54		≥ 0.330.31*	≥ 0.330.32*

Anti-Torsion Sole

ANTI TORSION

The Anti Torsion system uses a thermoplastic shank designed to increase stability on irregular and wet surfaces. Unlike standard shanks, it flexes with the foot's natural motion, reducing the risk of twists and falls. Ideal for outdoor work, especially in construction, where surface control is critical.

CASUAL PRO 20347

Introducing the new Casual line, designed for Ho.Re.Ca. professionals looking for a work shoe that combines sporty design, comfort, and innovation.

Models that redefine the concept of professional footwear, bringing a new balance of performance, style, and versatility to the catering and hospitality sectors.

Engineered for those working in restaurants, hospitality, and food service, the Casual line delivers the perfect balance between high technical performance and contemporary aesthetics.

The modern-looking upper is paired with an outsole featuring innovative concealed technology, developed to ensure comfort, stability, and freedom of movement throughout the workday.

The result? A reliable, lightweight, and sporty professional shoe, ideal for demanding work routines with comfort and safety, providing everything an industry professional needs without compromising on style.

From kitchen to dining area, counter to reception, and into leisure time: versatility is at the core of the Casual line. Thanks to their sporty and contemporary design, these models fit naturally even outside the workplace.
